DIRECTORY OF ILLINOIS MINERAL PRODUCERS

W. L. Busch

ILLINOIS STATE GEOLOGICAL SURVEY

John C. Frye, Chief • Urbana, Illinois 61801

JULY 1971

ILLINOIS STATE GEOLOGICAL SURVEY

3 3051 00006 2418

DIRECTORY OF ILLINOIS MINERAL PRODUCERS

W. L. Busch

This directory of Illinois mineral producers lists individuals or companies producing cement, clay and clay products, fluorspar, lime, lead and zinc, natural bonded molding sand, silica sand, tripoli, and peat.

Two other directories of mineral producers have been published by the Illinois State Geological Survey, one listing producers of limestone and dolomite and one noting producers of common sand and gravel. Although each directory is compiled from the best information available at the time of listing, complete and current information regarding every possible producer at any given time and place is not available.

Mineral production in Illinois in 1969 established an all-time high value of 692.9 million dollars, the fourth successive year that a new high in value for mineral production in this state had been attained. Based on 1969 production figures, the total value of the products produced by the mineral industries listed in this directory amounted to about 132.5 million dollars, or approximately 19.1 percent of the state's entire mineral value for the year.

Other minerals produced in Illinois during 1969 include crushed stone, which was valued at 78.4 million dollars, or 11.3 percent of the state's entire mineral product value. Common sand and gravel reported produced in 1969 had a total value of 40.3 million dollars, about 5.8 percent of the total state mineral value. The value of fuels produced in Illinois—coal and crude oil—amounting to 441.7 million dollars, was 63.8 percent of the state mineral value for 1969.

The companies producing fuels in Illinois are not included in the present series of directories. A list of current drilling for crude oil by county, company, and location within the county, is available in the report on oil and gas drilling in Illinois issued monthly by the Illinois State Geological Survey. Information regarding companies currently producing coal in Illinois may be obtained from the Illinois State Department of Mines and Minerals, Room 112, State Office Building, Springfield, Illinois 62706.

Included for the first time in this series of directories is a list of Illinois peat producers. In 1969, according to the U. S. Bureau of Mines, eight Illinois producers reported a total production of 67,330 tons of peat valued at \$958,000. A ninth producer is listed. The dollar value of peat is not included in any of the mineral values or percentages given above.

This directory of Illinois mineral producers replaces former directories of Illinois mineral producers, published as Mineral Economics Brief 8, June 1964, and Mineral Economics Brief 23, July 1968.
